

SWAP RC meeting 12/15/08

Greg Gee called the meeting to order at 7 PM, at Hobby Town. He thanked everyone for coming to the meeting and wished everyone a Merry Christmas, 21 members attended.

Minutes for the October and November meeting posted on the web site; it was agreed that everyone would read them there in order to save time.

Financial secretary read the treasury report – balance of \$4,775.54.

OLD BUSINESS

Nothing was brought up under old business

NEW BUSINESS

Our lock once again has disappeared, just a reminder to make sure you lock the lock and spin the tumblers when leaving. Some discussion about changing the combo again came up, but we don't know if this is a member doing it or not.

SHOW AND TELL

Russell brought a new helicopter to show everyone, after his was stolen. It is a T-Rex super nitro pro. It is very pretty, especially for the rotor heads. Zack was setting it up for him.

Doc showed a plane he got from Electric Mike, after it lost an argument with the ground. Doc fixed it up and put a nitro engine in it on a box that can be changed to and electric or what ever you want in it. Very ingenious, this Doc. He has flown it in level flight and is waiting for a calm day to put it through its paces.

Bob K. brought in some power supplies that he modified from computer power supplies. He will be getting some of these and will sell to club members for what it cost him to modify them.

David again was kind enough to open Hobby Town for a half hour with 20% off just about everything. He wished everyone a Merry Christmas. Thanks Dave!

Meeting was adjourned at 8 PM; food and fun was had by everyone and a lot of good socializing done.
